The global Thin Film SMD Resistors market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Thin Film SMD (Surface Mount Device) resistors are electronic components used in circuit boards that are manufactured using thin film deposition techniques. These resistors are typically made by depositing a thin film of resistive material (often metal alloy such as nichrome or tantalum nitride) onto a ceramic substrate. The deposition process allows for precise control over the resistor's resistance value and tolerance.

Global key players of Thin Film Chip Resistors include Vishay, Susumu, KOA Speer Electronics, Viking Tech, Yageo, etc. The top five players hold a share about 64%. China is the largest market, and has a share about 35%, followed by North America and Japan with share 17% and 17%, separately. In terms of product type, Ultra Precision 0.05% Tolerance is the largest segment, occupied for a share of 40%. In terms of application, Medical Equipment has a share about 29 percent.
