The three-conformal paint coating machine is a spraying equipment specially designed for spraying three-conformal paint. It is an automated mechanical equipment that controls the fluid and applies the fluid to the surface of the product. It is mainly used for the precise spraying of glue, paint and other liquids in the product process, and dripping to the precise position of each product, and can realize the coating of graphics such as drawing lines, circles or arcs.

The three-conformal paint coating machine adopts the latest computer control program, which can realize three-axis linkage, and is equipped with a camera positioning and tracking system, which can accurately control the spraying area. The paint is evenly sprayed on the surface of the object through the spraying system to form a protective film to achieve waterproof, oil-proof and dust-proof effects.

The three-conformal paint coating machine is widely used in LED, drive power supply, communication, computer motherboard, automation, electronic components, integrated circuits, circuit board electronic parts fixation and dust and moisture protection, electric welding machine, automotive electronics and other industries. It provides a clean and efficient fully automatic three-conformal spraying process, which meets the requirements of these industries for high performance, high reliability and high stability.
