Three-phase Fused Disconnect Switch is an electrical device that integrates the functions of a fuse and a disconnector, and is suitable for three-phase AC circuits. It automatically cuts off the current by melting the fuse when overloaded or short-circuited, and has a clear disconnection point of the disconnector, which can safely isolate the circuit under no-load conditions. This device is widely used in low-voltage power distribution systems, with both protection and isolation functions to ensure the safety and reliability of circuit operation.
