Abstracts

The global Three-Phase MOSFET Drivers market size is predicted to grow from US$ 69.11 million in 2025 to US$ 95.01 million in 2032; it is expected to grow at a CAGR of 4.7% from 2026 to 2032.

In 2024, global FET driver production reached 6.5784 million units, with an average selling price of US$10.27 per unit.

A three-phase MOSFET driver is a semiconductor driver circuit designed specifically for three-phase power topologies. Its core function is to achieve fast switching of MOSFETs in three-phase bridge circuits by precisely controlling the gate voltage (e.g., 10-20V), thereby regulating energy transmission efficiency and waveform quality in three-phase AC motors, inverters, or power conversion systems. This driver must integrate several key technical features, including isolated power supply for high-side and low-side drives, dead-time control, gate drive current matching, overcurrent, overtemperature, and undervoltage protection logic, and a compatible interface with digital controllers.

The upstream of three-phase MOSFET drivers is semiconductor materials and manufacturing equipment (silicon-based/compound semiconductor wafers, wide bandgap materials, lithography/etching/packaging equipment), represented by SUMCO, Shin-Etsu Chemical (silicon wafers), Wolfspeed (Cree), Rohm Semiconductor (SiC/GaN materials), ASML (lithography machines), Applied Materials (etching equipment), ASE (packaging substrates), etc.; the midstream is chip design, wafer manufacturing, module packaging and driver integration (Infineon, ON Semiconductor, STMicroelectronics, Texas Instruments, Renesas Electronics, Silan Microelectronics, Hua Hong Semiconductor, Changdian Technology, Huatian Technology, etc.); the downstream is new energy vehicles (electric drive systems, motor controllers), industrial inverters

(servo drives, PLC control), household appliance motors (air conditioner/refrigerator compressors), consumer electronics (fast charging/power adapters), 5G base stations (power amplifiers) and data centers (power modules).
