The thulium doped fiber laser treatment machine is a device used for medical beauty and skin treatment. The main principle is to use the high energy and high concentration beam of laser to treat the skin. The thulium doped fiber laser treatment machine uses thulium doped fiber as the laser medium, which can emit 1064 nanometers of laser beam and penetrate deep tissues of the skin for treatment. The thulium doped fiber laser treatment machine can be used in various fields such as skin beauty, hair removal, acne treatment, and vascular disease treatment. When using, doctors will adjust the parameters and treatment methods of the thulium doped fiber laser treatment machine according to the condition and treatment needs to achieve the best treatment effect. Thulium doped fiber laser treatment machine is a safe, painless, and non-invasive treatment method commonly used in beauty clinics, hospitals, and other places.
