The global Thyristor Rectifier market size is predicted to grow from US\$ 6549 million in 2025 to US\$ 8870 million in 2031; it is expected to grow at a CAGR of 5.2% from 2025 to 2031.

A thyristor rectifier is a type of rectifier circuit that uses thyristors as the main switching devices. Thyristors are semiconductor devices that can control the flow of electric current by acting as a switch.

Thyristor rectifiers play a crucial role in converting AC power to DC power in various electrical and electronic systems. In a thyristor rectifier circuit, the thyristors are used to convert alternating current (AC) to direct current (DC). The thyristors are turned on and off at specific times to allow the flow of current in only one direction, thus rectifying the AC waveform.

Thyristor rectifiers are commonly used in various applications, such as power supplies, motor drives, battery chargers, and welding machines. They offer advantages such as high efficiency, compact size, and the ability to handle high power levels.

There are different types of thyristor rectifiers, including single-phase and three-phase rectifiers. Single-phase rectifiers use a single thyristor or a pair of thyristors in a half-wave or full-wave configuration, respectively. Three-phase rectifiers use multiple thyristors in a bridge configuration to rectify three-phase AC power.

United States market for Thyristor Rectifier is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Thyristor Rectifier is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for Thyristor Rectifier is estimated to increase from US\$ million in 2024 to US\$ million by 2031, at a CAGR of % from 2025 through 2031.

Global key Thyristor Rectifier players cover Power Products International, Fuji Electric, STMicroelectronics, Dynapower, Caledon Controls, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2024.
