TIGLUTIK is a drug used to treat amyotrophic lateral sclerosis.

The amyotrophic lateral sclerosis (ALS) therapeutics market is driven by the increasing prevalence of ALS and the growing demand for effective treatments to slow disease progression and improve patient outcomes. As the understanding of ALS pathophysiology improves, researchers and pharmaceutical companies are actively exploring novel therapeutic approaches, including gene therapies and immune-modulating agents. The approval of new ALS drugs and the development of combination therapies further propel market growth. However, challenges include the complexity of ALS as a multi-factorial disease, the difficulty in diagnosing ALS at an early stage, and the high cost of drug development and clinical trials. Addressing these challenges through collaborative research, improved diagnostic tools, and accessible treatment options will be crucial for the sustained growth of the ALS therapeutics
