The tiled phased array antenna is a phased array system that uses a modular tile design. It splits a large-scale array into several spliced ??units, and achieves flexible expansion and rapid deployment of the array through a unified feed network and RF/digital front-end circuits. This architecture retains the electronic beam control capability of the phased array and has the scalability of large-area, on-demand assembly. It is widely used in 5G communications, radar, satellite communications, smart surfaces and other fields.

United States market for Tile-based Phased Array Antenna is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
