## Abstracts

The global TiN Metal HardMask PVD System market size is predicted to grow from US\$ 2348 million in 2025 to US\$ 4037 million in 2032; it is expected to grow at a CAGR of 8.1% from 2026 to 2032.

In 2025, the global production capacity of TiN metal hard mask PVD systems is approximately 700 units, with actual production reaching about 600 units. The average global market price is around US\$ 4.0 million per system, and gross margins in this segment typically range from 40% to 50%. A TiN Metal Hard Mask PVD System is a semiconductor manufacturing tool used to deposit titanium nitride thin films by physical vapor deposition for use as metal hard masks in advanced device fabrication. Through sputtering or related PVD techniques, the system forms dense, uniform TiN layers with excellent thickness control, adhesion, and film stability. TiN hard masks are widely applied in advanced logic, DRAM, and 3D NAND processes due to their superior etch resistance, thermal stability, and compatibility with high-aspect-ratio pattern transfer. As critical dimensions continue to shrink and process integration becomes more complex, TiN metal hard mask PVD systems play a critical role in enabling precise lithography pattern transfer and subsequent etching steps.

Upstream of the TiN metal hard mask PVD system industry chain includes high-purity titanium targets, nitrogen and argon process gases, vacuum chambers, magnetron sputtering sources, RF/DC power supplies, wafer handling modules, and process control software. The midstream consists of equipment design and manufacturing, covering sputtering source optimization, chamber engineering, film uniformity tuning, system integration, and reliability testing, representing the primary technological and value-added segment. Downstream customers are semiconductor foundries, IDMs, and memory manufacturers producing advanced logic, DRAM, and 3D NAND devices. The

industry chain further extends to equipment installation, process qualification, preventive maintenance, spare parts supply, and long-term service contracts, with service revenue accounting for an increasing share.
