Tinplate cans are commonly used for packaging food items like vegetables, fruits, soups, and drinks.

Film laminated steel sheet refers to a type of steel product that consists of multiple layers of different materials bonded together. This composite structure is achieved by using various methods, such as adhesive bonding or roll bonding. The outer layers of laminated steel sheet are typically made of steel, providing strength and durability. The inner layers can be made of different materials, such as plastics, polymers, or other metals, depending on the intended application.
