TiO₂ Free capsules with an alternative opacifier provides a TiO₂ Free white opacity and vegetarian solution for food supplement applications. The White appearance of capsules help it mask ingredients inside.

Regulatory agencies in various countries have raised concerns about the use of titanium dioxide in food and pharmaceutical products. This has prompted pharmaceutical and nutraceutical companies to seek TiO₂-free alternatives to ensure compliance with regulatory standards. The demand for clean-label products with fewer additives and recognizable ingredients has influenced the adoption of TiO₂-free capsules. Consumers are increasingly looking for transparency in product labeling. TiO₂-free capsules are perceived as a safer option for pharmaceuticals and dietary supplements, especially when used for long-term consumption. Concerns about potential health risks associated with TiO₂ have led to increased demand for alternatives.
