A tire repair kit is a set of tools and materials used to repair small punctures and leaks in a tire. It usually includes a reamer to clean out the puncture, a needle to insert a repair plug, and repair plugs made of rubber or other materials. Tire repair kits are designed to be used on tubeless tires and are a convenient solution for emergency repairs when a professional repair shop is not available. However, it's important to note that tire repair kits are not suitable for repairing larger punctures or sidewall damage, and should be used only as a temporary solution until a proper repair can be made by a professional.
