Abstracts

The global Tisotumab Vedotin for Injection market size is predicted to grow from US\$ 162 million in 2025 to US\$ 375 million in 2032; it is expected to grow at a CAGR of 11.6% from 2026 to 2032.

Tisotumab Vedotin for Injection is a tissue factor-directed antibody-drug conjugate composed of a human IgG1 monoclonal antibody, a protease-cleavable linker, and the microtubule-disrupting payload monomethyl auristatin E. After binding to tissue factor expressed on tumor cells, the antibody-drug conjugate is internalized and releases its cytotoxic payload, resulting in microtubule disruption, cell-cycle arrest, and tumor-cell death. The commercial product is supplied as a 40 mg lyophilized formulation for intravenous infusion and is generally administered at 2 mg/kg, up to a maximum of 200 mg, once every three weeks. The current commercial market is centered on the treatment of adults with recurrent or metastatic cervical cancer whose disease has progressed during or after prior chemotherapy or systemic treatment. This study covers product sales across approved commercialization regions and analyzes the market by commercialization region, treatment line, sales channel, and end user, with hospitals and specialist oncology institutions representing the principal treatment settings.

Key Findings

Tisotumab Vedotin for Injection is primarily used in previously treated recurrent or metastatic cervical cancer

The United States contributed more than four-fifths of global product sales in 2025

The current commercial product is concentrated in one 40 mg vial presentation

Commercialization has expanded from the United States into Europe, Japan, Hong Kong and mainland China

Manufacturing and commercialization rights remain concentrated among Pfizer, Genmab and Zai Lab

Market Trends

The Tisotumab Vedotin for Injection market is transitioning from a predominantly U.S.-based oncology product into a multi-regional commercial franchise. Following full approval in the United States, the product received European Union marketing authorization and Japanese approval in 2025, became available for prescribing in selected European markets, and obtained approval in mainland China in June 2026. The near-term commercial focus is therefore shifting toward reimbursement, hospital access, physician education, and patient identification across Europe and Asia rather than relying solely on deeper U.S. penetration. From a product-development perspective, the current market remains concentrated in later-line cervical cancer treatment, while the longer-term direction involves evaluating earlier treatment settings, combination regimens, and additional tissue factor-expressing solid tumors. Product adoption is also increasingly linked to the ability of healthcare institutions to standardize ocular monitoring, preventive eye care, infusion procedures, dose modification, and multidisciplinary adverse-event management.

Market Dynamics

Drivers

The principal market driver is the continuing unmet need among patients with recurrent or metastatic cervical cancer whose disease has progressed after previous systemic treatment. Tisotumab Vedotin for Injection has established clinical differentiation through randomized Phase III evidence demonstrating an overall survival benefit compared with investigator-selected chemotherapy, supporting the conversion from accelerated to full U.S. approval. Approvals in Europe, Japan, Hong Kong and mainland China have progressively enlarged the commercially accessible patient population, while the absence of biomarker-based patient selection simplifies the identification of eligible patients. Increasing familiarity with antibody-drug conjugates among gynecologic oncologists and the gradual integration of the product into institutional treatment pathways are expected to support utilization in specialist centers.

Restraints

Market expansion is limited by the relatively narrow population represented by previously treated recurrent or metastatic cervical cancer and by the clinical-management requirements associated with treatment. Tisotumab Vedotin for Injection can cause ocular adverse reactions, peripheral neuropathy, hemorrhage and other treatment-related toxicities that may require pretreatment examinations, preventive eye care, treatment interruption, dose reduction, or permanent discontinuation. The need for intravenous infusion and coordinated ophthalmic monitoring concentrates usage in hospitals and oncology centers with appropriate clinical infrastructure. High innovative-biologic treatment costs, differing national reimbursement timelines, and limited treatment capacity in lower-resource regions may further restrict patient access, particularly outside major urban medical centers.

Opportunities

The most immediate market opportunity is the conversion of recent regulatory approvals into reimbursed and routinely prescribed treatment across Europe, Japan and Greater China. Japan and Europe began contributing product sales during 2025, while mainland China entered the approved market in June 2026, creating additional opportunities through hospital listing, regional access programs, and future reimbursement coverage. Further upside may arise from movement into earlier treatment lines, combination strategies, and development in other tissue factor-expressing solid tumors. Improvements in ocular prophylaxis, adverse-event monitoring, and patient-management protocols could also broaden physician confidence and increase treatment continuation. Markets with established gynecologic oncology networks and centralized cancer treatment systems are likely to adopt the product faster than fragmented healthcare systems.

Challenges

The long-term challenge is to extend the commercial life cycle beyond a relatively small later-line cervical cancer population while maintaining a favorable benefit-risk profile. Tisotumab Vedotin for Injection competes at the treatment-pathway level with chemotherapy, immunotherapy-based regimens, other targeted medicines, and emerging antibody-drug conjugates rather than with another approved product containing the same active ingredient. Clinical development in earlier treatment lines or additional tumors must demonstrate sufficient incremental efficacy without creating

unacceptable cumulative toxicity. Market performance may also be affected by country-specific pricing negotiations, delayed formulary access, differences in supportive-care capacity, and the future evolution of patent and regulatory exclusivity. The concentration of manufacturing and commercial rights reduces direct same-product competition but increases dependence on a limited global supply and commercialization network.

Industry Chain Analysis

The upstream industry chain for Tisotumab Vedotin for Injection includes monoclonal antibody development and production, linker and MMAE payload manufacturing, conjugation materials, biologic-process consumables, analytical reagents, sterile containers, and cold-chain packaging. Manufacturing requires controlled antibody production, payload and linker synthesis, antibody-drug conjugation, purification, characterization, aseptic fill-finish, lyophilization, and batch-release testing. Critical quality attributes include antibody identity and purity, drug-to-antibody ratio, free-payload levels, aggregation, potency, sterility, and product stability. These processes create substantially higher technical, regulatory, and quality-control requirements than conventional small-molecule manufacturing.

The midstream layer is highly concentrated around the product's research, manufacturing, and commercialization rights holders. Pfizer is responsible for manufacturing and leads U.S. commercial operations, Genmab participates in global development and leads commercial activities in Europe, Japan, and most territories outside the United States and Greater China, while Zai Lab holds the Greater China development and commercialization rights. The downstream chain includes national and regional distributors, specialty pharmaceutical channels, hospital pharmacies, cancer hospitals, general hospitals with gynecologic oncology departments, infusion centers, and supporting ophthalmology services. Value is primarily created through proprietary biologic technology, clinical evidence, regulatory approvals, manufacturing consistency, market access, and specialized treatment support rather than through broad manufacturing competition.

Segment Insights

By Commercialization Region, the United States remained the dominant market in 2025 and represented more than four-fifths of global product sales. Europe and Japan formed the principal incremental regional markets following their 2025 approvals, while Greater China represents an emerging contribution following approvals in Hong Kong and mainland China. Other regions remain comparatively limited and depend on local

regulatory filings, reimbursement decisions, and the availability of specialist oncology infrastructure.

By Treatment Line, commercial demand is concentrated in second-line and third-line or later treatment for recurrent or metastatic cervical cancer. By Sales Channel, the market is served through direct institutional sales, pharmaceutical distributors, specialty pharmacy arrangements, and other authorized channels, with the precise mix varying by national healthcare system. By End User, cancer hospitals and large general hospitals account for most utilization because administration requires intravenous infusion, gynecologic oncology expertise, and ocular-risk management. Smaller medical institutions are less likely to use the product independently unless supported by referral, infusion, and specialist-monitoring networks.

Downstream Market Opportunities

The strongest downstream opportunities are concentrated in cancer hospitals, tertiary general hospitals, gynecologic oncology centers, and specialized infusion facilities that treat recurrent or metastatic cervical cancer. These institutions have the clinical expertise required to identify eligible patients, manage previous-treatment histories, conduct ophthalmic examinations, and implement preventive eye-care measures. Expansion opportunities are also linked to regional hospital listing, standardized treatment pathways, multidisciplinary cooperation, and improved reimbursement. Specialty pharmaceutical distributors and patient-support programs can improve product availability and treatment continuity, particularly in markets where oncology medicines are supplied through centralized or designated channels. In less-developed healthcare regions, access will depend on referral networks that connect local diagnosis with treatment at qualified regional cancer centers.

Regional Insights

The United States is the largest regional market and retains the deepest clinical experience, established reimbursement coverage, and longest commercial history. Europe and Japan are the most important recent expansion markets, but adoption is expected to vary by national reimbursement decisions, hospital formularies, and the speed of physician education. The European Union granted centralized marketing authorization in 2025, after which product sales began to be recorded in selected European markets and Japan. These regions should contribute a growing share as access expands beyond their initial launch markets.

Greater China represents the principal emerging regional opportunity. Hong Kong approved the product in 2025, and mainland China approved Tisotumab Vedotin for Injection in June 2026 for adults with recurrent or metastatic cervical cancer after disease progression during or after prior systemic treatment. Near-term growth will depend on commercial launch timing, hospital listing, physician education, regional distribution, and reimbursement access. Other regions are likely to develop more gradually because cervical cancer treatment infrastructure, ADC affordability, and specialist adverse-event management vary substantially across healthcare systems.

Competitive Landscape Analysis

The Tisotumab Vedotin for Injection market has an exclusive, partnership-based structure rather than a conventional multi-manufacturer competitive landscape. Pfizer, Genmab, and Zai Lab perform complementary roles within one global product-rights system and should not be interpreted as suppliers of competing versions. Pfizer is the confirmed manufacturing-responsibility holder and leads U.S. commercialization; Genmab is the originator and global co-development partner and leads commercial operations across Europe, Japan, and most other territories; Zai Lab is the exclusive development and commercialization partner for Greater China. The acquisition of Seagen consolidated its former ADC manufacturing and commercialization capabilities within Pfizer, eliminating the need to present Seagen as a separate competitor. Competitive pressure therefore arises primarily from alternative cervical cancer treatments, emerging ADCs, and future changes in treatment sequencing. Sustainable competitive advantage will depend on clinical differentiation, safety-management capability, regulatory expansion, reimbursement, hospital access, and the ability to extend the product into additional treatment settings while maintaining reliable global supply.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the "Tisotumab Vedotin for Injection Industry Forecast" looks at past sales and reviews total world Tisotumab Vedotin for Injection sales in 2025, providing a comprehensive analysis by region and market sector of projected Tisotumab Vedotin for Injection sales for 2026 through 2032. With Tisotumab Vedotin for Injection sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Tisotumab Vedotin for Injection industry.

This Insight Report provides a comprehensive analysis of the global Tisotumab Vedotin

for Injection landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Tisotumab Vedotin for Injection portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Tisotumab Vedotin for Injection market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Tisotumab Vedotin for Injection and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Tisotumab Vedotin for Injection.

This report presents a comprehensive overview, market shares, and growth opportunities of Tisotumab Vedotin for Injection market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

40 mg per Vial

Other

Segmentation by Treatment Line:

Second-line Treatment

Third-line or Later Treatment

Segmentation by Sales Channel:

Direct Sales

Distributor Sales

Segmentation by Application:

General Hospitals

Cancer Hospitals

Other

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Pfizer

Genmab

Zai Lab

Key Questions Addressed in this Report

What is the 10-year outlook for the global Tisotumab Vedotin for Injection market?

What factors are driving Tisotumab Vedotin for Injection market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Tisotumab Vedotin for Injection market opportunities vary by end market size?

How does Tisotumab Vedotin for Injection break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

- 2.1 World Market Overview
 - 2.1.1 Global Tisotumab Vedotin for Injection Annual Sales 2021-2032
 - 2.1.2 World Current & Future Analysis for Tisotumab Vedotin for Injection by Geographic Region, 2021, 2025 & 2032
 - 2.1.3 World Current & Future Analysis for Tisotumab Vedotin for Injection by Country/Region, 2021, 2025 & 2032
- 2.2 Tisotumab Vedotin for Injection Segment by Type
 - 2.2.1 40 mg per Vial
 - 2.2.2 Other
 - 2.2.3 Tisotumab Vedotin for Injection Sales by Type
 - 2.2.3.1 Global Tisotumab Vedotin for Injection Sales Market Share by Type (2021-2026)
 - 2.2.3.2 Global Tisotumab Vedotin for Injection Revenue and Market Share by Type (2021-2026)
 - 2.2.3.3 Global Tisotumab Vedotin for Injection Sale Price by Type (2021-2026)
- 2.3 Tisotumab Vedotin for Injection Segment by Treatment Line
 - 2.3.1 Second-line Treatment
 - 2.3.2 Third-line or Later Treatment
 - 2.3.3 Tisotumab Vedotin for Injection Sales by Treatment Line
 - 2.3.3.1 Global Tisotumab Vedotin for Injection Sales Market Share by Treatment Line (2021-2026)
 - 2.3.3.2 Global Tisotumab Vedotin for Injection Revenue and Market Share by Treatment Line (2021-2026)
 - 2.3.3.3 Global Tisotumab Vedotin for Injection Sale Price by Treatment Line

(2021-2026)

2.4 Tisotumab Vedotin for Injection Segment by Sales Channel

2.4.1 Direct Sales

2.4.2 Distributor Sales

2.4.3 Tisotumab Vedotin for Injection Sales by Sales Channel

2.4.3.1 Global Tisotumab Vedotin for Injection Sales Market Share by Sales Channel

(2021-2026)

2.4.3.2 Global Tisotumab Vedotin for Injection Revenue and Market Share by Sales Channel (2021-2026)

2.4.3.3 Global Tisotumab Vedotin for Injection Sale Price by Sales Channel

(2021-2026)

2.5 Tisotumab Vedotin for Injection Segment by Application

2.5.1 General Hospitals

2.5.2 Cancer Hospitals

2.5.3 Other

2.5.4 Tisotumab Vedotin for Injection Sales by Application

2.5.4.1 Global Tisotumab Vedotin for Injection Sale Market Share by Application

(2021-2026)

2.5.4.2 Global Tisotumab Vedotin for Injection Revenue and Market Share by Application (2021-2026)

2.5.4.3 Global Tisotumab Vedotin for Injection Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Tisotumab Vedotin for Injection Breakdown Data by Company

3.1.1 Global Tisotumab Vedotin for Injection Annual Sales by Company (2021-2026)

3.1.2 Global Tisotumab Vedotin for Injection Sales Market Share by Company

(2021-2026)

3.2 Global Tisotumab Vedotin for Injection Annual Revenue by Company (2021-2026)

3.2.1 Global Tisotumab Vedotin for Injection Revenue by Company (2021-2026)

3.2.2 Global Tisotumab Vedotin for Injection Revenue Market Share by Company

(2021-2026)

3.3 Global Tisotumab Vedotin for Injection Sale Price by Company

3.4 Key Manufacturers Tisotumab Vedotin for Injection Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Tisotumab Vedotin for Injection Product Location Distribution

3.4.2 Players Tisotumab Vedotin for Injection Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

- 3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
- 3.6 New Products and Potential Entrants
- 3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR TISOTUMAB VEDOTIN FOR INJECTION BY GEOGRAPHIC REGION

- 4.1 World Historic Tisotumab Vedotin for Injection Market Size by Geographic Region (2021-2026)
 - 4.1.1 Global Tisotumab Vedotin for Injection Annual Sales by Geographic Region (2021-2026)
 - 4.1.2 Global Tisotumab Vedotin for Injection Annual Revenue by Geographic Region (2021-2026)
- 4.2 World Historic Tisotumab Vedotin for Injection Market Size by Country/Region (2021-2026)
 - 4.2.1 Global Tisotumab Vedotin for Injection Annual Sales by Country/Region (2021-2026)
 - 4.2.2 Global Tisotumab Vedotin for Injection Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas Tisotumab Vedotin for Injection Sales Growth
- 4.4 APAC Tisotumab Vedotin for Injection Sales Growth
- 4.5 Europe Tisotumab Vedotin for Injection Sales Growth
- 4.6 Middle East & Africa Tisotumab Vedotin for Injection Sales Growth

5 AMERICAS

- 5.1 Americas Tisotumab Vedotin for Injection Sales by Country
 - 5.1.1 Americas Tisotumab Vedotin for Injection Sales by Country (2021-2026)
 - 5.1.2 Americas Tisotumab Vedotin for Injection Revenue by Country (2021-2026)
- 5.2 Americas Tisotumab Vedotin for Injection Sales by Type (2021-2026)
- 5.3 Americas Tisotumab Vedotin for Injection Sales by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC Tisotumab Vedotin for Injection Sales by Region

- 6.1.1 APAC Tisotumab Vedotin for Injection Sales by Region (2021-2026)
- 6.1.2 APAC Tisotumab Vedotin for Injection Revenue by Region (2021-2026)
- 6.2 APAC Tisotumab Vedotin for Injection Sales by Type (2021-2026)
- 6.3 APAC Tisotumab Vedotin for Injection Sales by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia
- 6.10 China Taiwan

7 EUROPE

- 7.1 Europe Tisotumab Vedotin for Injection by Country
 - 7.1.1 Europe Tisotumab Vedotin for Injection Sales by Country (2021-2026)
 - 7.1.2 Europe Tisotumab Vedotin for Injection Revenue by Country (2021-2026)
- 7.2 Europe Tisotumab Vedotin for Injection Sales by Type (2021-2026)
- 7.3 Europe Tisotumab Vedotin for Injection Sales by Application (2021-2026)
- 7.4 Germany
- 7.5 France
- 7.6 UK
- 7.7 Italy
- 7.8 Russia

8 MIDDLE EAST & AFRICA

- 8.1 Middle East & Africa Tisotumab Vedotin for Injection by Country
 - 8.1.1 Middle East & Africa Tisotumab Vedotin for Injection Sales by Country (2021-2026)
 - 8.1.2 Middle East & Africa Tisotumab Vedotin for Injection Revenue by Country (2021-2026)
- 8.2 Middle East & Africa Tisotumab Vedotin for Injection Sales by Type (2021-2026)
- 8.3 Middle East & Africa Tisotumab Vedotin for Injection Sales by Application (2021-2026)
- 8.4 Egypt
- 8.5 South Africa
- 8.6 Israel
- 8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Tisotumab Vedotin for Injection

10.3 Manufacturing Process Analysis of Tisotumab Vedotin for Injection

10.4 Industry Chain Structure of Tisotumab Vedotin for Injection

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Tisotumab Vedotin for Injection Distributors

11.3 Tisotumab Vedotin for Injection Customer

12 WORLD FORECAST REVIEW FOR TISOTUMAB VEDOTIN FOR INJECTION BY GEOGRAPHIC REGION

12.1 Global Tisotumab Vedotin for Injection Market Size Forecast by Region

12.1.1 Global Tisotumab Vedotin for Injection Forecast by Region (2027-2032)

12.1.2 Global Tisotumab Vedotin for Injection Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Tisotumab Vedotin for Injection Forecast by Type (2027-2032)

12.7 Global Tisotumab Vedotin for Injection Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 Pfizer

13.1.1 Pfizer Company Information

13.1.2 Pfizer Tisotumab Vedotin for Injection Product Portfolios and Specifications

13.1.3 Pfizer Tisotumab Vedotin for Injection Sales, Revenue, Price and Gross Margin (2021-2026)

13.1.4 Pfizer Main Business Overview

13.1.5 Pfizer Latest Developments

13.2 Genmab

13.2.1 Genmab Company Information

13.2.2 Genmab Tisotumab Vedotin for Injection Product Portfolios and Specifications

13.2.3 Genmab Tisotumab Vedotin for Injection Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Genmab Main Business Overview

13.2.5 Genmab Latest Developments

13.3 Zai Lab

13.3.1 Zai Lab Company Information

13.3.2 Zai Lab Tisotumab Vedotin for Injection Product Portfolios and Specifications

13.3.3 Zai Lab Tisotumab Vedotin for Injection Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Zai Lab Main Business Overview

13.3.5 Zai Lab Latest Developments
