The global Titanium Dioxide White Masterbatch market size is predicted to grow from US$ 4956 million in 2025 to US$ 6389 million in 2032; it is expected to grow at a CAGR of 3.8% from 2026 to 2032.

In 2024, global Titanium Dioxide White Masterbatch production reached approximately 5,250 kilotons?with an average global market price of around US$ 920 per ton. Titanium Dioxide White Masterbatch is a concentrated mixture of titanium dioxide (TiO?) pigments, polymer carrier resins, and performance-enhancing additives, which is used to impart a brilliant white color, opacity, and improved processing performance to plastic products. Produced through a specialized compounding process, this masterbatch disperses TiO? particles uniformly within the carrier resin, ensuring excellent color consistency, high covering power, and superior whiteness across a wide range of applications. Titanium dioxide, as the primary pigment, provides exceptional brightness, chemical stability, and UV resistance, making the masterbatch suitable for both indoor and outdoor applications. The carrier resin is selected to match the base polymer (such as polyethylene, polypropylene, polystyrene, or engineering plastics), thereby ensuring optimal compatibility and easy processing during extrusion, injection molding, blow molding, or film production.

United States market for Titanium Dioxide White Masterbatch is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
