TN Screen

The industry trend for TN Screens has been witnessing a gradual decline in recent years. As technology advances, manufacturers and consumers are increasingly shifting towards more advanced display technologies like IPS (In-Plane Switching) and OLED (Organic Light-Emitting Diode) screens. These alternatives offer superior color reproduction, wider viewing angles, and better overall visual quality. Additionally, the demand for high-resolution displays and immersive visual experiences has fueled the adoption of these advanced technologies. While TN screens still have a place in entry-level or budget devices, the industry trend suggests a movement towards more advanced display technologies for enhanced user experience and visual performance.
