A torsion trailer axle is a type of suspension system commonly used in trailers, particularly in utility trailers, travel trailers, and some types of recreational vehicles (RVs). Unlike traditional leaf spring or coil spring suspension systems, which use metal springs to absorb shocks and provide support, torsion axles rely on rubber cords or 'torsion arms' to provide both suspension and load-bearing capabilities.

The global Torsion Trailer Axle market size is projected to grow from US\$ 1804 million in 2024 to US\$ 2700 million in 2030; it is expected to grow at a CAGR of 7.0% from 2024 to 2030.
