Touchless Elevator allows the user to operate the elevator without touching the buttons, to call the elevator and select the destination from the landing. Passengers can either use their own mobile or simply a printed pass with a QR code to navigate the elevator. Touchless Elevator configuration is ideal for large buildings with automated elevators, such as high-rise commercial office spaces or multi-family residential buildings. Unlike conventional push button, it will reduce the chance of any accidental virus transmission, making it safe for everyone to use the lift.
