Tracked fire fighting vehicle is a specialized vehicle designed for combating fires in rugged or difficult terrain. It is equipped with tracks, similar to those found on tanks, which provide enhanced mobility and stability. The vehicle typically has a large water tank, pumps, hoses, and firefighting equipment onboard. It is commonly used in forest fires or other situations where traditional firefighting vehicles might struggle to access or operate. The tracks enable the vehicle to traverse rough terrain, such as steep hills, uneven surfaces, or debris-laden areas, providing firefighters with agility and maneuverability. Tracked fire-fighting vehicles are designed to deliver water or fire retardant directly to the fire, helping to control and extinguish flames in challenging

conditions.
