Trailer Variable Message Signs are trailer-mounted LED changeable message displays used to deliver temporary, real-time traffic information such as roadwork warnings, lane closures, speed guidance, detour instructions, and incident alerts. Designed for rapid deployment and relocation, they support programmable messages, high daytime visibility, and remote control via wireless communication. These systems improve work-zone safety and traffic flow by enabling agencies and contractors to update information quickly without fixed infrastructure, making them suitable for highways, urban roads, and special-event traffic management. Midstream focuses on assembly and integration of displays, firmware, communications, diagnostics, lifting mechanisms, and compliance testing for outdoor durability. Downstream users are roadwork contractors, highway agencies, municipalities, event organizers, and emergency responders that deploy signs for temporary traffic control. Service links include installation, commissioning, training, maintenance, spare parts, and connectivity subscriptions to ensure uptime and reliable message delivery.
