The global Transformer Bushing Monitoring System market size is predicted to grow from US\$ 939 million in 2025 to US\$ 1233 million in 2031; it is expected to grow at a CAGR of 4.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Among the reasons for transformer outages, bushing failures are often the cause. It is common to find a bushing testing poorly, and there have been many noted total transformer failures due to bushing failures. One reason may be because bushings are often tested offline to measure capacitance, dissipation factor and power factor.

Transformer Bushing Monitoring System detects deterioration in bushings, finding abnormalities in the insulation and issuing actionable alerts.

According to the National Bureau of Statistics, in 2022, China's power generation was 8.8 trillion kWh, with a year-on-year increase of 3.7%.
