Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Trawler boats are mainly used for two purposes: fishing and recreational activities. Fishing trawlers are used to catch fish or shellfish from deep water. These trawlers can be found fishing from the deep waters of the world's coastlines upto depths of 2,000 mt (6,560 ft). The demand for these trawler boats are increasing due to rise in fuel cost as they consume less fuel and offered better displacement hulls at lower speed. On contrary, recreational trawlers boats are the luxury boats that are used for cruising, long touring from one place to other and many other purposes.
