The report requires updating with new data and is sent in 48 hours after order is placed.

The global Treadmill market size is predicted to grow from US\$ 5736 million in 2025 to US\$ 6370 million in 2031; it is expected to grow at a CAGR of 1.8% from 2025 to 2031.

A treadmill is a device generally for walking or running while staying in the same place. The belt moves to the rear, requiring the user to walk or run at a speed matching that of the belt. The rate at which the belt moves is the rate of walking or running. Thus, the speed of running may be controlled and measured. The more expensive, heavy-duty versions are motor-driven (usually by an electric motor). The simpler, lighter, and less expensive versions passively resist the motion, moving only when walkers push the belt with their feet. The latter are known as manual treadmills.

Global Treadmill key players include ICON Health & Fitness, BH, Life Fitness, Johnson Health, Nautilus, etc. Global top five manufacturers hold a share over 45%.

North America is the largest market, with a share over 35%, followed by Europe and Asia-Pacific, both have a share over 45%.

In terms of product, Single Function Treadmill is the largest segment, with a share about 87%. And in terms of application, the largest application is Home, followed by Commercial, etc.
