The global Trefoil Type Cable Cleats market size is predicted to grow from US\$ 158 million in 2025 to US\$ 196 million in 2031; it is expected to grow at a CAGR of 3.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Cable cleat is a cable management product used to support and hold cables when installed at intervals along the length of cables. These are useful in ensuring long life of cables as they reduce damage caused to the cables due to their own weight. Cable cleats have been useful in applications having heavy cables, power lines and transportation infrastructure. In 2003, the standard of cable cleats for electrical installations, EN 50368, was published, and in 2009, IEC 61914 was published. Since then, cable cleats manufacturers are producing their products under the same standard.

The industry is very fragmented and the market is very competitive. The global key Cable Cleats manufacturers include CMP Products, Prysmian Group etc. CMP Products dominated the market with 15.92% revenue market share in 2022, followed by Prysmian Group and Ellis Patents. Other key companies in this market include Panduit, Eaton, Dutchclamp, KOZ Products BV, Axis Electrical Components, Emelec, SS Engineering India, BICC Components, Novoflex Marketing, Oglaend System and Nantong Naco Fluid Equipment etc.

Geographically, Europe and USA markets are relatively mature, and APAC is the fastest-growing region, especially China, which plays a more important role in the world.

The main growth point of the market is expected to turn to developing countries and less developed countries. Because the saturation of the market such as electric energy in these countries is far from enough, the market growth is estimated to remain strong throughout the forecast period.
