Abstracts

The global Trenchless Construction Service market size is predicted to grow from US\$ 1498 million in 2025 to US\$ 2459 million in 2032; it is expected to grow at a CAGR of 7.4% from 2026 to 2032.

Trenchless construction service is a specialized offering in the field of civil engineering and infrastructure development. It encompasses a range of techniques and professional expertise aimed at installing, repairing, or replacing underground utilities like pipes, cables, and conduits without resorting to extensive open trenching. These services utilize advanced equipment and innovative methods such as horizontal directional drilling, which precisely guides a drill head to create a subsurface path for new installations; pipe bursting, where an existing pipe is fragmented while simultaneously pulling in a new one; and cured-in-place pipe (CIPP) lining, which rehabilitates pipes from the inside by curing a resin-saturated liner. Trenchless construction services are highly valued for their ability to minimize disruption to the surface, including traffic flow, existing structures, and the natural environment. They are particularly beneficial in urban areas, environmentally sensitive regions, and locations with challenging access. By leveraging these services, clients can achieve cost-effective, efficient, and less intrusive infrastructure solutions, often with reduced project timelines compared to traditional trenching approaches.

Key Findings

Trenchless Construction Service supports underground utility installation replacement and rehabilitation with limited surface excavation

HDD addresses new pipeline crossings while pipe bursting and CIPP primarily serve

existing asset renewal

Water and sewer systems constitute a core demand base for recurring trenchless rehabilitation projects

Project economics depend strongly on diameter length depth ground conditions and construction risk allocation

Market Trends

The Trenchless Construction Service industry is shifting from individual construction techniques toward integrated underground asset solutions covering inspection, engineering, installation, rehabilitation and post-construction verification. Utilities increasingly require contractors to select methods according to asset condition and whole-life performance rather than simply minimizing the initial construction price. Within rehabilitation projects, conventional thermally cured CIPP is being complemented by ultraviolet and LED curing systems, reinforced liners, pressure-pipe solutions and localized robotic repair. HDD service providers are improving steering, tracking, drilling-fluid management and digital bore-record capabilities to address more complex crossings and tighter tolerances. Another important direction is the combination of trenchless work with CCTV inspection, cleaning, bypass pumping, service reconnection and manhole rehabilitation under a single contract. These changes favor contractors that can provide engineering support, verified installation procedures and documented quality assurance rather than construction labor alone.

Market Dynamics

Drivers

Aging water, wastewater, gas and utility networks are creating sustained requirements for pipeline replacement and structural rehabilitation, while urban density makes prolonged open-cut construction increasingly disruptive. Government-supported water infrastructure financing in the United States, strengthened wastewater obligations in Europe, sewer renewal programs in Japan and urban underground pipeline upgrading in China provide a broad institutional foundation for Trenchless Construction Service demand. HDD, pipe bursting and CIPP can be particularly attractive where projects cross roads, railways, rivers, developed districts or environmentally sensitive locations because they reduce continuous excavation and surface restoration requirements. Expansion of broadband, power transmission and distribution infrastructure also

supports demand for trenchless conduit and cable installation.

Restraints

Trenchless methods do not eliminate construction risk, and their suitability remains highly dependent on geotechnical conditions, existing utility records, host-pipe geometry and access-shaft availability. Unexpected rock, groundwater, voids, collapsed pipes or undocumented crossings can increase drilling time, material consumption and project costs. Specialized rigs, curing systems, inspection equipment and experienced operators require substantial investment, making equipment utilization and workforce scheduling critical to profitability. Municipal procurement based mainly on the lowest initial bid can limit the adoption of higher-specification solutions, while small or irregular projects may not generate sufficient scale to justify mobilization. Method-specific design requirements and differing owner specifications also restrict complete standardization across regions and applications.

Opportunities

The most attractive opportunities are developing in integrated pipeline renewal programs, pressure-pipe rehabilitation, small-diameter service laterals and complex utility crossings. UV-cured and LED-cured lining systems can broaden the addressable range of CIPP applications by improving curing control and construction productivity in suitable projects. Contractors can also expand their value proposition through condition assessment, digital asset records, engineering design, emergency response and long-term maintenance frameworks. Water-loss reduction, infiltration control and climate-resilient drainage investment create additional opportunities in municipal systems, while grid reinforcement, renewable-energy connections, data networks and industrial pipeline upgrades support HDD and other new-installation methods. Companies capable of combining proprietary materials, equipment access and trained installation networks are positioned to capture a larger share of project value.

Challenges

Execution quality remains the central long-term challenge because completed underground work is difficult and costly to correct. Bore-path deviation, drilling-fluid loss, liner defects, incomplete curing, service-connection errors and insufficient host-pipe preparation can affect performance and generate contractual disputes. The industry must maintain qualified personnel across engineering, equipment operation, liner installation, inspection and safety functions at a time when experienced underground

construction labor is limited in many markets. Owners also apply different design standards, testing procedures and contractor qualification requirements, increasing the administrative burden for companies operating across jurisdictions. Successful service providers therefore require disciplined project selection, site investigation, method-specific quality controls and clear allocation of subsurface and performance risks.

Industry Chain Analysis

The upstream portion of the Trenchless Construction Service industry chain comprises drilling rigs, bursting equipment, winches, pipe-jacking and microtunneling systems, CCTV inspection equipment, robotic tools, locating and guidance systems, pumps, compressors and curing equipment. Material inputs include polyethylene and other product pipes, CIPP liners, thermosetting resins, glass-fiber reinforcement, coatings, grouts, drilling fluids and connection components. Engineering consultants, geotechnical specialists, equipment rental providers, material manufacturers and logistics companies support project preparation and execution.

The midstream segment consists of specialized trenchless contractors and integrated infrastructure service groups responsible for site investigation, method selection, design coordination, mobilization, construction, testing and handover. Downstream customers include municipal water and sewer authorities, oil and gas pipeline operators, telecommunications companies, electric utilities, industrial facilities, transportation agencies and property owners. Value is created through accurate diagnosis, suitable technology selection, controlled installation and reduced disruption to surrounding infrastructure. Major cost components include skilled labor, specialist equipment, liners or replacement pipes, mobilization, bypass systems, subcontracting, traffic management and risk contingencies. Profitability depends on equipment utilization, procurement structure, project complexity, change-order management and the contractor's ability to control subsurface and execution risks.

Segment Insights

Horizontal Directional Drilling (HDD) Services are primarily used for new installations beneath roads, rivers, railways and developed areas. The segment is technically differentiated by bore length, diameter, geological complexity, steering accuracy and drilling-fluid control. Larger and more complex crossings generally require stronger engineering, higher-capacity equipment and detailed geotechnical planning, creating barriers for small regional contractors.

Pipe Bursting Services address complete pipeline replacement along an existing alignment and are particularly relevant where the host pipe has lost structural integrity or additional hydraulic capacity is required. Cured-in-Place Pipe (CIPP) Lining Services retain the existing alignment and create a new liner within the host pipe, making them suitable for recurring sewer, stormwater and selected pressure-pipeline rehabilitation programs. The Others category covers microtunneling, pipe jacking, auger boring, pipe ramming, sliplining, close-fit lining, spray-applied systems and localized repairs. Each method has a distinct technical envelope, and competitive advantage depends on matching the method to pipe condition, ground conditions, access constraints and required design performance.

Downstream Market Opportunities

Water and sewer systems provide the broadest recurring opportunity because utilities must manage leakage, infiltration, corrosion, structural deterioration and capacity constraints across extensive underground networks. Multi-year rehabilitation frameworks can generate more predictable workloads than isolated projects and support investment in specialized equipment and trained crews. Gas and oil pipeline opportunities are driven by replacement of aging distribution lines, integrity improvement and crossings required for network expansion. Telecommunications and electrical cable projects benefit from broadband deployment, grid reinforcement and the need to install conduits beneath congested urban corridors. Across these applications, the strongest opportunities arise where service providers can integrate surveying, utility locating, design, construction and digital completion records into a coordinated delivery model.

Regional Insights

North America represents one of the most developed commercial environments for Trenchless Construction Service, supported by established specialist contractors, structured professional training and continuing water infrastructure renewal. The market covers large HDD crossings, municipal CIPP programs, pipe bursting and localized residential or commercial services, producing a multi-tier competitive structure. Europe has advanced capabilities in trenchless pipe rehabilitation, liner technology and quality-controlled municipal renewal, with regulatory attention to wastewater systems supporting long-term demand.

Asia-Pacific presents a combination of mature technical capabilities and substantial incremental infrastructure requirements. Japan has established trenchless engineering expertise for sewer renewal and complex urban construction, while China's urban

renewal policy is supporting extensive upgrading of underground gas, water, sewage and other pipeline networks.

Competitive Landscape Analysis

The competitive landscape is fragmented and differentiated by project scale, construction method, geography and customer type. Michels Trenchless, Inc., Mears Group, Inc., Haugland Group LLC, The Crossing Group, J.W. Fowler Co., Lanzo Trenchless Technologies, Okumura Corporation, Kubota Construction Co., Ltd. and Yasuda Engineering Co., Ltd. participate in technically demanding underground infrastructure and crossing projects where engineering capability, equipment scale, safety performance and project references are important qualification factors. Per Aarsleff A/S (Aarsleff Pipe Technologies), Azuria Water Solutions and Vortex Companies have stronger positioning in pipeline rehabilitation platforms, supported by lining technologies, specialized installation capabilities and broader renewal service portfolios. Trenchless Construction Services, LLC, Earth View, LLC, A.R. Daniel Construction Services, Inc., Loy Clark Construction, Complete Trenchless Inc., Hardiman Construction, Inc. (Trenchless Titan), Beacon Plumbing, R&D Construction and Allied Waterproofing & Drainage, Inc. (Trenchless in Seattle) reflect the importance of regional execution networks and local customer access. Zhangzhou Anyue New Material Technology Co., Ltd. and Shanghai Guanli Construction Engineering Co., Ltd. represent participation from the Chinese market. Competitive success depends less on a single technology than on prequalification, engineering depth, equipment availability, material control, trained crews, local permitting knowledge and consistent project delivery. Official company information confirms continued specialization and geographic expansion in the pipe-renewal segment, but the available evidence does not support assigning precise global market shares or an absolute company ranking.

Report Scope

LPI (LP Information)' newest research report, the "Trenchless Construction Service Industry Forecast" looks at past sales and reviews total world Trenchless Construction Service sales in 2025, providing a comprehensive analysis by region and market sector of projected Trenchless Construction Service sales for 2026 through 2032. With Trenchless Construction Service sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Trenchless Construction Service industry.

This Insight Report provides a comprehensive analysis of the global Trenchless

Construction Service landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyses the strategies of leading global companies with a focus on Trenchless Construction Service portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Trenchless Construction Service market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Trenchless Construction Service and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Trenchless Construction Service.

This report presents a comprehensive overview, market shares, and growth opportunities of Trenchless Construction Service market by product type, application, key players and key regions and countries.

Market Segmentation

Segmentation by Type:

Horizontal Directional Drilling (HDD) Services

Pipe Bursting Services

Cured-in-Place Pipe (CIPP) Lining Services

Others

Segmentation by Construction Project Delivery Mode:

Turnkey Integrated Trenchless Service

Segmented Single Process Service

Segmentation by Maximum Construction Pipeline Diameter:

Small-Diameter Construction: Pipe OD < 300 mm

Medium-Diameter Construction: Pipe OD 300 mm – 1200 mm

Large-Diameter Construction: Pipe OD > 1200 mm

Segmentation by Application:

Water and Sewer Systems

Gas and Oil Pipelines

Telecommunications and Electrical Cables

Others

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analyzing the company's coverage, product portfolio, its market penetration.

Michels Trenchless, Inc.

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Trenchless Construction Service Market Size (2021-2032)
- 2.1.2 Trenchless Construction Service Market Size CAGR by Region (2021 VS 2025 VS 2032)
- 2.1.3 World Current & Future Analysis for Trenchless Construction Service by Country/Region (2021, 2025 & 2032)

2.2 Trenchless Construction Service Segment by Type

- 2.2.1 Horizontal Directional Drilling (HDD) Services
- 2.2.2 Pipe Bursting Services
- 2.2.3 Cured-in-Place Pipe (CIPP) Lining Services
- 2.2.4 Others
- 2.2.5 Trenchless Construction Service Market Size by Type
 - 2.2.5.1 Trenchless Construction Service Market Size CAGR by Type (2021 VS 2025 VS 2032)
 - 2.2.5.2 Global Trenchless Construction Service Market Size Market Share by Type (2021-2026)

2.3 Trenchless Construction Service Segment by Construction Project Delivery Mode

- 2.3.1 Turnkey Integrated Trenchless Service
- 2.3.2 Segmented Single Process Service
- 2.3.3 Trenchless Construction Service Market Size by Construction Project Delivery Mode
 - 2.3.3.1 Trenchless Construction Service Market Size CAGR by Construction Project Delivery Mode (2021 VS 2025 VS 2032)
 - 2.3.3.2 Global Trenchless Construction Service Market Size Market Share by

Construction Project Delivery Mode (2021-2026)

2.4 Trenchless Construction Service Segment by Maximum Construction Pipeline Diameter

2.4.1 Small-Diameter Construction: Pipe OD < 300 mm

2.4.2 Medium-Diameter Construction: Pipe OD 300 mm – 1200 mm

2.4.3 Large-Diameter Construction: Pipe OD > 1200 mm

2.4.4 Trenchless Construction Service Market Size by Maximum Construction Pipeline Diameter

2.4.4.1 Trenchless Construction Service Market Size CAGR by Maximum Construction Pipeline Diameter (2021 VS 2025 VS 2032)

2.4.4.2 Global Trenchless Construction Service Market Size Market Share by Maximum Construction Pipeline Diameter (2021-2026)

2.5 Trenchless Construction Service Segment by Application

2.5.1 Water and Sewer Systems

2.5.2 Gas and Oil Pipelines

2.5.3 Telecommunications and Electrical Cables

2.5.4 Others

2.5.5 Trenchless Construction Service Market Size by Application

2.5.5.1 Trenchless Construction Service Market Size CAGR by Application (2021 VS 2025 VS 2032)

2.5.5.2 Global Trenchless Construction Service Market Size Market Share by Application (2021-2026)

3 TRENCHLESS CONSTRUCTION SERVICE MARKET SIZE BY PLAYER

3.1 Trenchless Construction Service Market Size Market Share by Player

3.1.1 Global Trenchless Construction Service Revenue by Player (2021-2026)

3.1.2 Global Trenchless Construction Service Revenue Market Share by Player (2021-2026)

3.2 Global Trenchless Construction Service Key Players Head office and Products Offered

3.3 Market Concentration Rate Analysis

3.3.1 Competition Landscape Analysis

3.3.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.4 New Products and Potential Entrants

3.5 Mergers & Acquisitions, Expansion

4 TRENCHLESS CONSTRUCTION SERVICE BY REGION

- 4.1 Trenchless Construction Service Market Size by Region (2021-2026)
- 4.2 Global Trenchless Construction Service Annual Revenue by Country/Region (2021-2026)
- 4.3 Americas Trenchless Construction Service Market Size Growth (2021-2026)
- 4.4 APAC Trenchless Construction Service Market Size Growth (2021-2026)
- 4.5 Europe Trenchless Construction Service Market Size Growth (2021-2026)
- 4.6 Middle East & Africa Trenchless Construction Service Market Size Growth (2021-2026)

5 AMERICAS

- 5.1 Americas Trenchless Construction Service Market Size by Country (2021-2026)
- 5.2 Americas Trenchless Construction Service Market Size by Type (2021-2026)
- 5.3 Americas Trenchless Construction Service Market Size by Application (2021-2026)
- 5.4 United States
- 5.5 Canada
- 5.6 Mexico
- 5.7 Brazil

6 APAC

- 6.1 APAC Trenchless Construction Service Market Size by Region (2021-2026)
- 6.2 APAC Trenchless Construction Service Market Size by Type (2021-2026)
- 6.3 APAC Trenchless Construction Service Market Size by Application (2021-2026)
- 6.4 China
- 6.5 Japan
- 6.6 South Korea
- 6.7 Southeast Asia
- 6.8 India
- 6.9 Australia

7 EUROPE

- 7.1 Europe Trenchless Construction Service Market Size by Country (2021-2026)
- 7.2 Europe Trenchless Construction Service Market Size by Type (2021-2026)
- 7.3 Europe Trenchless Construction Service Market Size by Application (2021-2026)
- 7.4 Germany
- 7.5 France
- 7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Trenchless Construction Service by Region (2021-2026)

8.2 Middle East & Africa Trenchless Construction Service Market Size by Type (2021-2026)

8.3 Middle East & Africa Trenchless Construction Service Market Size by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 GLOBAL TRENCHLESS CONSTRUCTION SERVICE MARKET FORECAST

10.1 Global Trenchless Construction Service Forecast by Region (2027-2032)

10.1.1 Global Trenchless Construction Service Forecast by Region (2027-2032)

10.1.2 Americas Trenchless Construction Service Forecast

10.1.3 APAC Trenchless Construction Service Forecast

10.1.4 Europe Trenchless Construction Service Forecast

10.1.5 Middle East & Africa Trenchless Construction Service Forecast

10.2 Americas Trenchless Construction Service Forecast by Country (2027-2032)

10.2.1 United States Market Trenchless Construction Service Forecast

10.2.2 Canada Market Trenchless Construction Service Forecast

10.2.3 Mexico Market Trenchless Construction Service Forecast

10.2.4 Brazil Market Trenchless Construction Service Forecast

10.3 APAC Trenchless Construction Service Forecast by Region (2027-2032)

10.3.1 China Trenchless Construction Service Market Forecast

10.3.2 Japan Market Trenchless Construction Service Forecast

10.3.3 Korea Market Trenchless Construction Service Forecast

- 10.3.4 Southeast Asia Market Trenchless Construction Service Forecast
- 10.3.5 India Market Trenchless Construction Service Forecast
- 10.3.6 Australia Market Trenchless Construction Service Forecast
- 10.4 Europe Trenchless Construction Service Forecast by Country (2027-2032)
 - 10.4.1 Germany Market Trenchless Construction Service Forecast
 - 10.4.2 France Market Trenchless Construction Service Forecast
 - 10.4.3 UK Market Trenchless Construction Service Forecast
 - 10.4.4 Italy Market Trenchless Construction Service Forecast
 - 10.4.5 Russia Market Trenchless Construction Service Forecast
- 10.5 Middle East & Africa Trenchless Construction Service Forecast by Region (2027-2032)
 - 10.5.1 Egypt Market Trenchless Construction Service Forecast
 - 10.5.2 South Africa Market Trenchless Construction Service Forecast
 - 10.5.3 Israel Market Trenchless Construction Service Forecast
 - 10.5.4 Turkey Market Trenchless Construction Service Forecast
- 10.6 Global Trenchless Construction Service Forecast by Type (2027-2032)
- 10.7 Global Trenchless Construction Service Forecast by Application (2027-2032)
 - 10.7.1 GCC Countries Market Trenchless Construction Service Forecast

11 KEY PLAYERS ANALYSIS

- 11.1 Michels Trenchless, Inc.
 - 11.1.1 Michels Trenchless, Inc. Company Information
 - 11.1.2 Michels Trenchless, Inc. Trenchless Construction Service Product Offered
 - 11.1.3 Michels Trenchless, Inc. Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.1.4 Michels Trenchless, Inc. Main Business Overview
 - 11.1.5 Michels Trenchless, Inc. Latest Developments
- 11.2 Per Aarsleff A/S (Aarsleff Pipe Technologies)
 - 11.2.1 Per Aarsleff A/S (Aarsleff Pipe Technologies) Company Information
 - 11.2.2 Per Aarsleff A/S (Aarsleff Pipe Technologies) Trenchless Construction Service Product Offered
 - 11.2.3 Per Aarsleff A/S (Aarsleff Pipe Technologies) Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)
 - 11.2.4 Per Aarsleff A/S (Aarsleff Pipe Technologies) Main Business Overview
 - 11.2.5 Per Aarsleff A/S (Aarsleff Pipe Technologies) Latest Developments
- 11.3 Mears Group, Inc.
 - 11.3.1 Mears Group, Inc. Company Information
 - 11.3.2 Mears Group, Inc. Trenchless Construction Service Product Offered

11.3.3 Mears Group, Inc. Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.3.4 Mears Group, Inc. Main Business Overview

11.3.5 Mears Group, Inc. Latest Developments

11.4 Azuria Water Solutions

11.4.1 Azuria Water Solutions Company Information

11.4.2 Azuria Water Solutions Trenchless Construction Service Product Offered

11.4.3 Azuria Water Solutions Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.4.4 Azuria Water Solutions Main Business Overview

11.4.5 Azuria Water Solutions Latest Developments

11.5 Okumura Corporation

11.5.1 Okumura Corporation Company Information

11.5.2 Okumura Corporation Trenchless Construction Service Product Offered

11.5.3 Okumura Corporation Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.5.4 Okumura Corporation Main Business Overview

11.5.5 Okumura Corporation Latest Developments

11.6 Vortex Companies

11.6.1 Vortex Companies Company Information

11.6.2 Vortex Companies Trenchless Construction Service Product Offered

11.6.3 Vortex Companies Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.6.4 Vortex Companies Main Business Overview

11.6.5 Vortex Companies Latest Developments

11.7 Haugland Group LLC

11.7.1 Haugland Group LLC Company Information

11.7.2 Haugland Group LLC Trenchless Construction Service Product Offered

11.7.3 Haugland Group LLC Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.7.4 Haugland Group LLC Main Business Overview

11.7.5 Haugland Group LLC Latest Developments

11.8 Kubota Construction Co., Ltd.

11.8.1 Kubota Construction Co., Ltd. Company Information

11.8.2 Kubota Construction Co., Ltd. Trenchless Construction Service Product Offered

11.8.3 Kubota Construction Co., Ltd. Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.8.4 Kubota Construction Co., Ltd. Main Business Overview

11.8.5 Kubota Construction Co., Ltd. Latest Developments

11.9 The Crossing Group

11.9.1 The Crossing Group Company Information

11.9.2 The Crossing Group Trenchless Construction Service Product Offered

11.9.3 The Crossing Group Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.9.4 The Crossing Group Main Business Overview

11.9.5 The Crossing Group Latest Developments

11.10 J.W. Fowler Co.

11.10.1 J.W. Fowler Co. Company Information

11.10.2 J.W. Fowler Co. Trenchless Construction Service Product Offered

11.10.3 J.W. Fowler Co. Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.10.4 J.W. Fowler Co. Main Business Overview

11.10.5 J.W. Fowler Co. Latest Developments

11.11 Lanzo Trenchless Technologies

11.11.1 Lanzo Trenchless Technologies Company Information

11.11.2 Lanzo Trenchless Technologies Trenchless Construction Service Product Offered

11.11.3 Lanzo Trenchless Technologies Trenchless Construction Service Revenue, Gross Margin and Market Share (2021-2026)

11.11.4 Lanzo Trenchless Technologies Main Business Overview

11.11.5 Lanzo Trenchless Technologies Latest Developments

11.12 Yasuda Engineering Co., Ltd.

11.12.1 Yasuda Engineering Co., Ltd. Company Information
