The global TRIAC Dimmable LED Driver market size is predicted to grow from US$ 227 million in 2025 to US$ 321 million in 2031; it is expected to grow at a CAGR of 5.9% from 2025 to 2031.

TRIAC dimmable LED driver is a power management device that can control the phase of the input AC voltage waveform to adjust the brightness of the LED lamp. The driver starts chopping from the zero phase of the AC voltage, cuts the voltage waveform by adjusting the conduction angle, and then generates a modulated output voltage to reduce the power consumption of the load. It has a compact and lightweight design, high adjustment accuracy, easy operation, and can be controlled from a distance. The advantages of TRIAC dimmable LED driver are its high working efficiency, stable and reliable performance, and low dimming cost, so it occupies an important market position in dimming solutions.
