Trichloroethylene (TCE) is a volatile organic compound commonly used as a solvent for degreasing, cleaning, and as a chemical intermediate in various industries.

The market for Trichloroethylene (TCE) is driven by its applications in cleaning and degreasing processes, particularly in industrial and commercial settings. TCE is used to remove oil, grease, and other contaminants from metal surfaces and electronic components. The continuous demand for industrial solvents and cleaning agents may further influence market dynamics. However, the market may face challenges related to the potential health and environmental risks associated with TCE, leading to increasing regulatory restrictions and the need for safer and eco-friendly alternatives.
