The global Trimethylamine Aqueous Solution market size is predicted to grow from US\$ 131 million in 2025 to US\$ 176 million in 2032; it is expected to grow at a CAGR of 4.4% from 2026 to 2032.

Trimethylamine aqueous solution refers to a liquid organic amine product formed by dissolving trimethylamine gas in water, which belongs to one of the important forms of methylamine series compounds. This product has strong alkalinity and good reactivity, and is safer during storage and transportation compared to anhydrous trimethylamine. In industry, methylamine mixture is usually produced by amination reaction between methanol and ammonia under the action of catalyst, and then separated and absorbed into water to obtain trimethylamine aqueous solutions of different concentrations. This product is mainly used in industries such as surfactants, pharmaceutical intermediates, pesticide intermediates, resin additives, disinfectants, and fine chemicals. In 2025, global Trimethylamine Aqueous Solution production reached approximately 498 K MT, with an average global market price of around US\$ 269 per ton.

The annual production capacity of trimethylamine aqueous solution is 700 tons, with a gross profit margin of about 20%.

Upstream: The main raw materials for trimethylamine aqueous solution are methanol and ammonia, with methanol usually coming from the coal to methanol or natural gas to methanol industry chain, and ammonia coming from the synthetic ammonia industry.

Downstream: mainly used in industries such as surfactants, pharmaceutical intermediates, pesticide intermediates, disinfectants, resin additives, and fine chemicals, among which surfactants and fine chemicals are the main sources of demand.

Raw material costs account for approximately 60% to 70%, energy and utility costs account for approximately 10% to 15%, manufacturing and equipment depreciation costs account for approximately 7% to 10%, and packaging and logistics costs account for approximately 5% to 8%.

United States market for Trimethylamine Aqueous Solution is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
