The global Triphosphoric Acid market size is predicted to grow from US\$ 429 million in 2025 to US\$ 602 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

Triphosphoric Acid is an inorganic condensed phosphate compound with the chemical formula $H_3P_3O_{10}$, formed through the dehydration and polymerization of phosphoric acid molecules. It is mainly used as an intermediate in phosphate chemistry, water treatment formulations, detergents, metal surface treatment chemicals, food-grade phosphate production, specialty fertilizers, and laboratory reagents. The supply chain of Triphosphoric Acid begins upstream with phosphorus ore mining and beneficiation, followed by the production of phosphoric acid through wet-process or thermal-process technologies using sulfuric acid and elemental phosphorus. Midstream manufacturing involves controlled condensation reactions, purification, concentration, and stabilization processes to produce Triphosphoric Acid and related polyphosphate compounds in liquid or solid forms. Key raw materials include phosphate rock, sulfur, ammonia, and industrial-grade phosphoric acid, while processing equipment includes corrosion-resistant reactors, evaporators, and crystallization systems. Downstream demand comes from water treatment chemical manufacturers, detergent and cleaning product producers, food additive companies, metal finishing industries, agriculture and fertilizer sectors, and specialty chemical laboratories, particularly in regions with strong phosphate chemical industries such as China, North America, and Europe. In 2025, global Triphosphoric Acid output was about 320,000 tons with 360,000 tons of capacity, average prices of USD 1,200-2,500 per ton, and gross margins around 24%.

United States market for Triphosphoric Acid is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Triphosphoric Acid is estimated to increase from US\$ million in 2025

to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
