Tris (hydroxymethyl) aminomethane (commonly referred to as Tris) is an organic compound with a molecular formula of $C_4H_{11}NO_3$ and a CAS Number of 77-86-1. In the pharmaceutical industry, it is called tromethamine (THAM). It is a white crystal or powder. It is a chemical substance soluble in ethanol and water, slightly soluble in ethyl acetate and benzene, insoluble in ether and carbon tetrachloride, corrosive to copper and aluminum, and irritating. Tris is widely used in the preparation of buffers in biochemical and molecular biology experiments. Tris is a weak base with a pKa of 8.1 at 25°C; according to buffer theory, the effective buffering range of Tris buffer is between pH 7.0 and 9.2. The pH of the aqueous solution of Tris base is about 10.5. Generally, hydrochloric acid is added to adjust the pH value to the desired value, and then the buffer solution with the pH value can be obtained. For example, Tris is required in both TAE and TBE buffers (for solubilization of nucleic acids) commonly used in biochemical experiments. Since it contains amino groups, it can undergo condensation reactions with aldehydes. In addition, Tris is also an intermediate in the preparation of surfactants, vulcanization accelerators and some pharmaceuticals. Tris is also used as a titration standard.

The global market for Tris (hydroxymethyl) Aminomethane is estimated to increase from US\$ 308.5 million in 2021 to reach US\$ 1513.5 million by 2028, exhibiting a CAGR of 25.5% during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

Global top two manufacturers of Tris (hydroxymethyl) Aminomethane occupied for a share nearly 98%. ANGUS Chemical is the largest manufacturer in the world, has a share about 83%, followed by Suzhou Yacoo Science. North America is the largest producer, holds a share around 53%, followed by Europe and China, with share 26% and 19%, separately. The largest market is North America, has a share about 43%, followed by Asia-Pacific and Europe, with around 29% and 27% market share respectively.
