The global Truck Exhaust Etraction Systems market size is predicted to grow from US\$ 493 million in 2025 to US\$ 873 million in 2032; it is expected to grow at a CAGR of 9.3% from 2026 to 2032.

In 2025, global Truck Exhaust Etraction System approximately 142,824 units, with an average global market price of around US\$ 3527 per unit. Gross margin is about 51%. The cost is 1,728 usd. The Production is about 280,000 units. A Truck Exhaust Extraction System is a workplace ventilation and occupational safety solution designed to capture and remove diesel exhaust emissions generated when vehicles are idling, parked, or undergoing maintenance. Using nozzles, hoses, fans, and ducting, the system extracts harmful pollutants such as particulate matter (PM), carbon monoxide (CO), and nitrogen oxides (NOx) from indoor spaces and vents them outdoors or through filtration units, thereby protecting personnel and complying with air quality and safety regulations. Upstream components include high-temperature hoses, fans, motors, rail components, and filtration media; midstream manufacturers handle system engineering, installation, and control integration; downstream users include bus depots, logistics fleets, maintenance workshops, and inspection stations.

1. Regulation-Driven Demand

Stricter occupational exposure limits for diesel exhaust will increase mandatory installation in garages and maintenance facilities.

2. Automation and Vehicle Integration

Systems will integrate with vehicle detection and facility control systems, enabling

automatic connection and release operations.

3. Enhanced Filtration and Purification

Advanced particulate filtration and gas adsorption units will support indoor operation where outdoor venting is restricted.

4. Adaptation to Mixed Fleets

As electric and hybrid vehicles increase, systems will evolve into broader indoor air management solutions handling exhaust and thermal emissions.

5. Smart and Energy-Efficient Operation

Air quality sensors and variable-speed fans will optimize airflow, reducing energy consumption and operating costs.
