The trunk seal is a sealing element used in the trunk of a vehicle. Its main function is to prevent rain, dust, noise and vibration from entering the trunk, thereby protecting the luggage. Common shapes include U-type, D-type, P-type and foam type. When installing, it needs to be pasted or snapped on the edge of the trunk lid or the corresponding part of the car body. High-quality seals have good waterproof, dustproof, soundproof and shock-absorbing properties, ensuring that the interior of the trunk is clean and safe and improving driving comfort. Regularly checking and replacing aging or damaged seals can maintain a good sealing effect in the trunk.

The global Trunk Sealing Strip market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
