Abstracts

The global Tunnel Axial Jet Fan market size is predicted to grow from US$ 246 million in 2025 to US$ 453 million in 2032; it is expected to grow at a CAGR of 9.3% from 2026 to 2032.

Global sales of tunnel axial jet fans are expected to reach approximately 105,000 units in 2024, with an average price of approximately US$2,200. This type of blower is a high-volume supply and exhaust fan specifically designed for long-distance ventilation and smoke exhaust in highway, railway, and subway tunnels. Its axial-flow impeller design enables high-flow, low-resistance gas transport within limited installation space, ensuring air quality and emergency smoke exhaust safety in tunnel environments. Market demand for TAFBs is highly dependent on the number of new highway, railway, and subway tunnels being built and maintained globally. For example, installation demand is particularly high in tunnel-dense regions such as Europe and China. The upstream supply involves the supply of motors, impeller steel, and variable frequency control systems. Downstream applications include transportation infrastructure operators, tunnel construction general contractors, and municipal engineering companies.

United States market for Tunnel Axial Jet Fan is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Tunnel Axial Jet Fan is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
