The turbo trainer tire market is a niche segment within the cycling industry. Turbo trainer tires are specialized tires designed to be used specifically with indoor bike trainers. These tires have characteristics that make them suitable for the unique demands of indoor training, such as lower noise, reduced wear and tear on the tire, and compatibility with the roller drums of trainers. Turbo trainer tires are designed to be durable and provide a smooth, consistent contact surface with the trainer's roller. They are often made of a harder compound than outdoor road tires to minimize wear during indoor use.
