A turntable is the circular rotating platform of a phonograph (a.k.a. record player, gramophone, turntable, etc.), a device for playing sound recordings. The phonograph is a device invented in 1877 for the mechanical recording and reproduction of sound. In its later forms it is also called a gramophone (as a trademark since 1887, as a generic name since c. 1900). The sound vibration waveforms are recorded as corresponding physical deviations of a spiral groove engraved, etched, incised, or impressed into the surface of a rotating cylinder or disc, called a 'record'. To recreate the sound, the surface is similarly rotated while a playback stylus traces the groove and is therefore vibrated by it, very faintly reproducing the recorded sound. In early acoustic phonographs, the stylus vibrated a diaphragm which produced sound waves which were coupled to the open air through a flaring horn, or directly to the listener's ears through stethoscope-type earphones. The disc phonograph record was the dominant audio recording format throughout most of the 20th century. From the mid-1980s on,

phonograph use on a standard record player declined sharply because of the rise of the cassette tape, compact disc and other digital recording formats. Records are still a favorite format for some audiophiles and DJs. Vinyl records are still used by some DJs and musicians in their concert performances. Musicians continue to release their recordings on vinyl records. The original recordings of musicians are sometimes re-issued on vinyl.

Global Turntables key players include Pro-ject, Audio-Technica, Crosley, Panasonic Corporation, Sony, etc. Global top five manufacturers hold a share about 75%. North America and Europe is the largest market, both with a share about 40%, followed by Asia-Pacific, with a share about 15 percent. In terms of product, Belt-drive turntable is the largest segment, with a share about 40%. And in terms of application, the largest application is Home entertainment, followed by Music production, Bar and music club, etc.
