Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Twin Screw Extruders market.

Twin screw extruder is the classic machine used for the plastic extrusion process when two or more ingredients are mixed or compounded. The process is best suited when extruding reactive polymeric materials. It has higher economic opportunities and business potential than single screw extruders, owing to higher process flexibility and productivity, to produce wider range of end products, to convert materials and handle product quality more consistently, to compensate the effect of screw wear through screw speed adjustment.

For the Twin-screw Extruders industry, the market is concentrated. Coperion, Milacron and JSW are the leader companies globally. On the basis of product type, Co-Rotating type segment is projected to account for the largest consumption value market share

during the forecast period; this segment was estimated to account for 57% share in 2019 in terms of consumption value.
