Two-fluid air atomizing nozzle is a nozzle that uses compressed air and liquid to atomize liquid into tiny water droplets. The nozzle produces fine and uniform mist spray through the synergistic effect of air and liquid, and is often used in cooling, humidification, spraying, cleaning and other fields. Compared with single liquid nozzles, two-fluid nozzles can achieve more efficient atomization effect, reduce droplet size and improve system performance. It is widely used in industrial cooling, environmental control, agricultural irrigation and other occasions.
