According to our LPI (LP Information) latest study, the global Two Platen Injection Molding Machine market size was valued at US\$ 8721.1 million in 2023. With growing demand in downstream market, the Two Platen Injection Molding Machine is forecast to a readjusted size of US\$ 12000 million by 2030 with a CAGR of 4.7% during review period.

The research report highlights the growth potential of the global Two Platen Injection Molding Machine market. Two Platen Injection Molding Machine are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Two Platen Injection Molding Machine. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Two Platen Injection Molding Machine market.

Two Platen Injection Molding Machine is medium and large-sized plastic parts molding equipment. It is applicable to automotive industry such as bumper and instrument panel, air-conditioner compressor housing, and even pallet over 3000 tons .

Chinese injection molding machines are still dominated by three-platen injection molding machines, while in developed countries in Europe and the United States, compact two-platen injection molding machines have become the mainstream of the market. The structure of the piston in the oil cylinder of the two-platen injection molding machine is complicated. If the piston of the oil cylinder is small, the hydraulic valve

cannot be installed, so it cannot be used in small and medium-sized machines, and it is generally suitable for larger models. The two-platen injection molding machine is the mainstream in the development of mainframes. Domestic companies such as Chen Hsong and Haitian are developing and producing two-platen injection molding machines, and some products have been successfully developed. There are five manufacturers with the best quality and performance of two-platen injection molding machines in the world: ENGEL, KraussMaffei, Mitsubishi Heavy Industries, Haitianhong series and Yizumi DP series.
