Two-stroke oil (also known as two-stroke oil, two-stroke oil, 2T oil, or two-stroke oil) is a special type of oil used in crankcase compression two-stroke engines (typically small gasoline-powered engines). Unlike a four-stroke engine whose crankcase is closed except for the ventilation system, a two-stroke engine uses the crankcase as part of the intake tract, so the oil must be mixed with gasoline to be distributed throughout the engine for lubrication.
