The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The factors for the use of two-wheel shock absorbers include:

- 1. Ride comfort:** Two-wheel shock absorbers play a crucial role in providing a smoother and more comfortable ride for motorcycles and bicycles. They absorb and dampen the impacts and vibrations caused by uneven road surfaces, bumps, and obstacles, reducing the jolts and shocks felt by the rider.
- 2. Stability and control:** Shock absorbers enhance the stability and control of two-wheeled vehicles. They help maintain tire contact with the road or trail surface, minimizing traction loss and improving handling, especially during cornering or sudden maneuvers.
- 3. Safety:** Two-wheel shock absorbers contribute to safety by ensuring the stability and predictability of the vehicle. By reducing excessive movements and vibrations, they help prevent loss of control and maintain the rider's balance, reducing the risk of accidents.
- 4. Load bearing:** Two-wheel shock absorbers support the weight of the vehicle and its occupants. They enable proper weight distribution and balance, ensuring optimal

performance and handling characteristics.

5. **Durability and reliability:** Two-wheel shock absorbers are designed to withstand the demanding operational conditions faced by motorcycles and bicycles. They are built with durable materials and components that can withstand constant compression and extension forces, providing long-term reliability and performance.

6. **Customization and adjustability:** Two-wheel shock absorbers often offer customization and adjustability options. Riders can choose from different types, sizes, and damping characteristics to match their preferences and riding styles. Adjustable shock absorbers allow riders to fine-tune the suspension to optimize comfort and performance for specific conditions or riding scenarios.
