A Two-wheeler Battery Swap Cabinet is a battery replacement device designed for electric motorcycles or electric bicycles. It provides multi-compartment storage for securely storing and swapping batteries, thereby enhancing the range and convenience of two-wheeled electric vehicles. This device is typically installed in public areas, allowing users to swap batteries at any time, making it especially suitable for shared electric two-wheeler services. Battery swapping allows for maximum asset utilization and can offer significant cost savings for commercial-scale utilization such as fleet operators and shared-mobility providers. It promises future reductions in battery price which in turn would further accelerate the adoption of light-duty electric vehicles and serves to allay concerns related to range anxiety.
