Ultrasonic sterilization equipment is suitable for the sterilization of liquid food, its basic form has three kinds: hydraulic ultrasonic generator, cleaning trough ultrasonic generation system and lube rod ultrasonic generation system. Ultrasonic sterilizer is suitable for fruit and vegetable juice drinks, alcohol, milk, mineral water, soy sauce and other liquid food. Compared with the traditional high temperature heat sterilization technology, ultrasonic effect will not change the color, aroma, taste of food, nor destroy food components. However, the ultrasonic cavitation can improve the coagulation of bacteria and make them lose or die of virulence, so as to achieve the purpose of sterilization.
