Unbleached Natural Kraft Paper is a strong, durable paper made from virgin wood pulp using the kraft process, without undergoing any bleaching treatment. This gives the paper its natural brown color and retains more of the wood's inherent strength and fiber integrity. Known for its high tensile strength and tear resistance, unbleached kraft paper is widely used in packaging applications where both structural integrity and environmental friendliness are important. Because it avoids chemical bleaching, the production of this paper has a lower environmental impact and better biodegradability, making it a preferred choice for sustainable packaging solutions. It is often used in grocery bags, wrapping, protective packaging, and industrial applications, as well as in eco-conscious product packaging. The paper is also recyclable and compostable, aligning with global trends in reducing plastic waste and promoting renewable materials.
