Universal potting resin is a widely used liquid polymer material, mainly used for packaging and protection of electronic components, power modules, LED driver power supplies, sensors and other products. Its function is to form a solid insulating layer by pouring the resin material into the inside or surface of the device after curing, effectively isolating moisture, dust, chemical corrosion and mechanical impact, thereby improving the stability and life of the product. Universal potting resins are mostly epoxy resins or polyurethanes, with good fluidity, low shrinkage and excellent electrical insulation properties.
