## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

A unmanned tractor is an autonomous farm vehicle that delivers a high tractive effort (or torque) at slow speeds for the purposes of tillage and other agricultural tasks. It is considered driverless because it operates without the presence of a human inside the tractor itself. Like other unmanned ground vehicles, they are programmed to independently observe their position, decide speed, and avoid obstacles such as people, animals, or objects in the field while performing their task.

The global market for Unmanned Tractors is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Unmanned Tractors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States Unmanned Tractors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe Unmanned Tractors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China Unmanned Tractors market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

Global key Unmanned Tractors players cover Deere and Company, Autonomous Tractor Corporation (ATC), Fendt, Case IH and St. Petersburg Tractor Plant (PTZ), etc. In terms of revenue, the global largest two companies occupy a share nearly % in 2021.
