The global Unsweetened Oat Milk market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

In recent years, the unsweetened oat milk market has experienced significant growth and expansion across the globe. In terms of region, North America is expected to remain the largest market for unsweetened oat milk during the forecast period, followed by Europe and Asia Pacific.

Unsweetened oat milk is a non-dairy milk alternative made from oats and water. It is produced by blending oats with water and then straining the mixture to remove any solids. The resulting liquid is a smooth, creamy, and slightly sweet milk substitute. Unsweetened oat milk is called so because it does not contain any added sugars or sweeteners. It relies on the natural sweetness present in oats, which is relatively mild compared to other sweeteners. The absence of added sugars makes unsweetened oat milk a popular choice for those who prefer a lower-sugar or sugar-free option.
