The global Urea Phosphate market size is predicted to grow from US$ 594 million in 2025 to US$ 824 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

Urea phosphate is a ruminant feed additive that is superior to urea and can provide both non protein nitrogen and phosphorus simultaneously. Feed additive: specifically designed for the nutritional supplementation of ruminant and herbivorous livestock such as cattle and sheep, with significant effects on the feeding of dairy, meat, and young livestock. Efficient fertilizer: Its characteristics have significantly better application effects on plants in the early and middle stages than traditional fertilizers such as urea, ammonium phosphate, and potassium dihydrogen phosphate. Silage preservative: Urea phosphate is a good preservative for fruits and vegetables, as well as silage for forage and feed, with excellent silage preservation effect. Industrial use: flame retardant; Cleaning agent; rust remover; preservative. In 2024, global Urea Phosphate production reached approximately 588.23K MT, with an average global market price of around US$ 986 per MT.The annual production capacity of a single production line is 15000 tons, with a gross profit margin of around 20%.

Upstream industry: The cost of upstream raw materials accounts for about 80% of the total cost.

1. Basic raw materials:

Phosphate ore: the most fundamental source. The price and supply stability of phosphate ore are greatly influenced by national policies, environmental requirements, and mining quotas.

Sulfur/sulfuric acid: a key raw material for producing wet process phosphoric acid. The

price of imported sulfur has a significant impact on costs.

Urea: Originating from the fertilizer industry, its price exhibits significant cyclicality.

2. Direct raw material: phosphoric acid.

Downstream industry core customers: Ruminant animal feed factories; Pre mixed material production enterprises; Agricultural fertilizers, etc.

United States market for Urea Phosphate is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Urea Phosphate is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
