The global Ursolic Acid market size is predicted to grow from US\$ 7.4 million in 2025 to US\$ 9.4 million in 2031; it is expected to grow at a CAGR of 4.1% from 2025 to 2031.

Ursolic acid is a lipophilic pentacyclic triterpenoid. It is a biologically active compound found in many plants (a phytochemical). It is widely used in pharmaceutical industry, cosmetic industry and food?health care products industry, because of its anti-inflammatory, antifungal, antitumor, antiulcer and antiviral properties.

The whole ursolic acid industry is relatively scattered as there are many medium and small size companies engaged in. China is the largest producer of the product.

Market Drivers:

Growing Demand for Natural Ingredients: Ursolic acid, derived primarily from apple peel and various herbs, is gaining popularity in the cosmetic and pharmaceutical industries due to its natural origin. As consumers increasingly seek natural, plant-based products, the demand for ursolic acid has grown, particularly in skincare formulations and dietary supplements.

Anti-Inflammatory and Antioxidant Properties: Ursolic acid is recognized for its anti-inflammatory, antioxidant, and anti-cancer properties. These health benefits have driven its application in various therapeutic areas, particularly in managing chronic diseases like diabetes, obesity, and heart disease. This has increased its demand in the nutraceutical market.

Increasing Awareness of Healthy Lifestyles: As global awareness about healthy lifestyles

and preventive healthcare rises, consumers are turning to natural products that can help improve their overall health. Ursolic acid, with its broad spectrum of health benefits, has become a popular ingredient in weight management, anti-aging, and immunity-boosting products.

Expansion of the Cosmetic Industry: The cosmetic industry has been increasingly adopting ursolic acid for its skin-enhancing properties. It is used in formulations for anti-aging, skin firming, and moisturizing products. This trend is contributing to the growth of the ursolic acid market.

Market Challenges:

Limited Availability of Raw Materials: Ursolic acid is primarily sourced from natural herbs like rosemary, thyme, and apple peel, which limits the consistency and volume of supply. Fluctuations in the availability of these raw materials can impact production rates and pricing.

Competition from Synthetic Alternatives: Synthetic substitutes and other natural compounds with similar health benefits may pose a threat to the growth of the ursolic acid market. These alternatives may be cheaper and more readily available, which could make it difficult for ursolic acid to compete in certain sectors.
