It quickly forms a robust layer on surfaces exposed to UV light, while simultaneously allowing the coating film to fully cure under components or in shaded areas via moisture.

Upstream suppliers primarily provide photosensitive resins, moisture-curing groups, and key additives, including specialty oligomers and monomers containing both photosensitive and moisture-curing functional groups. Downstream applications are mainly in the electronics manufacturing industry, where high production efficiency and product reliability are paramount.">UV/moisture dual curing conformal coating is an electronic protective coating that achieves rapid curing through the synergistic effect of ultraviolet light and ambient moisture.
