The global V2G Bidirectional Charging Pile market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

V2G stands for Vehicle-to-Grid, which uses the unique energy storage function of electric vehicles to interact with the grid in two directions. Its core idea is to use a large number of energy storage devices of electric vehicles as a buffer for the grid and renewable energy. When the grid load is too high, the energy storage battery of the electric vehicle provides reverse power to the grid. When the grid load is low, the energy storage battery can store the grid's excess power generation and reduce waste.

United States market for V2G Bidirectional Charging Pile is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
