Benzilic Acid Methyl Ester, also known as methyl benzoate, is a common organic compound with the formula $C_8H_8O_2$ and can be chemically regarded as the product of alcoholysis of benzoic acid or benzoic anhydride or benzoyl chloride with methanol. This colorless transparent liquid is insoluble in water, but can be miscible with methanol, ethanol and ether. It is widely used in food, cosmetics, medicine, pesticides and coatings and other industries, not only as spices and flavoring agents to enhance the fragrance of food, but also for the production of perfume, medicine and skin care products, and in the pesticide and coating industry also has a certain application.

The market prospect of methyl benzoate is broad, and its market size is expected to further expand with the increasing demand for high-quality chemicals in various industries. However, it should be noted that there are also certain technical thresholds and competition in the methyl benzoate market, and manufacturers need to have relevant production processes and quality control capabilities.
